TRIBUNE JOB PRINTING COMPANY

MINNEAPOLIS

MINN.

WE ISSUE this Book containing a few of the many sketches, made by us and on file in our offices, of Court Houses, School Houses, Hotels, Opera Houses, Churches, Residences, Etc., with a view of interesting those who contemplate building, in corresponding with us. We also make special mention of some of the different contractors and dealers in material, who have constructed buildings or furnished material for us, during the past eighteen years that we have been in business in Minneapolis.

STEAM AND HOT WATER HEATING
ALL WORK GUARANTEED

MINNEAPOLIS, MINN.

THIS WELL-KNOWN FIRM....

Has been in business in Minneapolis for a period of eighteen years. It has advanced from a very small beginning, until it is now one of the largest concerns in its line, in the Northwest.

Its uniform success and continuous growth is ascribed to its policy, at all times, of doing only first-class work.

This firm has done the plumbing, etc., in many of the largest and most important buildings in this city, and other portions of the state.

The following is a partial list of some of the larger contracts which it has recently completed or has still in hand:

New Court House and City Hall,	Minneapolis
Court House	Manchester, Iowa
Court House	Alexandria, Minn.
County Buildings	Barron, Wis.

Steam Fitting, etc., in the following Elevators, viz:

Republic, Monarch, Interior, Great Western
Empire, Osborn and McMillan at Minneapolis
Douglas & Co.'s Flax Mill and Elevator, Minneapolis
Two large Elevators at Duluth
Lehigh Valley Coal Co.'s Dock at West Superior
Water Works at Gladstone, Michigan

Plumbing, etc., in the following buildings:

Syndicate Block, Bank of Commerce
Nicollet National Bank, Chamber of Commerce
Grand Opera House, Commercial Club
Residences of O. C. Wyman, 25th and Park Ave.
F. H. Peavey, Minnetonka
Mrs. P. B. Plumb, Emporia, Kansas
Mrs. Thompson, Emporia, Kansas
Wm. Martindale, Emporia, Kansas
Mr. Jas. Garrison, Slayton, Minnesota
Mr. W. G. Northrup, Minnetonka
Prof. Kiehli, State University
Sol Smith Russell, J. L. Record, of Barnet & Record
Hon. R. D. Russell, J. F. Conklin, E. G. Walton, etc.

TRADE MARK
ASBESTOS

THE STANDARD PAINTS FOR
STRUCTURAL PURPOSES

Liquid Paints

THESE are in every respect Strictly First-Class Paints, composed of pure linseed oil and the highest grade of pigments. They are combined by processes exclusively our own, and are unequalled by any in richness and permanency of color. As, in addition to the usual grinding, these paints are re-ground while in the liquid state, they are far superior to ordinary paints in their covering properties, and the general testimony

is that from fifteen to twenty-five per cent. of the usual cost of painting can be saved by their use. They are prepared ready for use in fifty-six standard colors, and are sold by U. S. standard gallon measure, which contains from eight to twelve per cent. more than is usually sold for a gallon. One gallon will cover from 275 to 300 square feet, two coats, without thinning, and can be thinned with one-half gallon pure linseed oil to one gallon of paint for first coat. We are pleased to answer inquiries from all who contemplate painting their houses; to make suggestions regarding colors to be used, and give estimates of quantity and cost of paint necessary. Correspondents will please give particulars regarding size, style and surroundings of their buildings, and send photograph or architect's design, when possible.

Shingle Stains

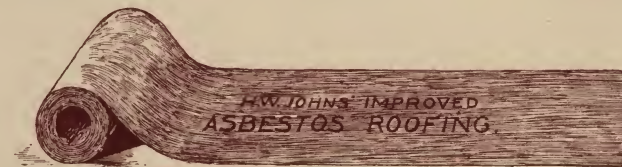

These are composed of the most durable wood preservatives known. Our twenty colors comprise the Silver Grays, Nut Browns, Moss Greens and Weather Stained effects, so desirable for the prevailing types of architecture.

BOARD OF EDUCATION

.....OF.....

THE CITY OF DULUTH

OFFICE OF THE PRESIDENT

DICTATED

DULUTH, MINN., May 13th, 1895.

The Pond & Hasey Co., Minneapolis, Minn.,

GENTLEMEN:—I take pleasure in stating that the heating and ventilating apparatus placed by you in the Central High School, has worked to our entire satisfaction during the past two years, and we most heartily endorse your system and style of work. Our building has forty-five rooms including the auditorium, containing about 20,000 square feet direct radiation, about 10,000 feet indirect radiation, together with about 3,000 feet mass coil, and has five seven-foot fans, an eighty-five H. P. Automatic Engine, 4-60 x 16 horizontal tubular boilers, with all necessary attachments and connections. We most cheerfully recommend you and your services to any desiring a complete heating and ventilating plant.

We can speak in same terms of the heating and ventilating plant placed by you in the Longfellow School in this city. It has twelve rooms, and is heated by 2-48 x 14 boilers, with same system. Yours truly,

H. W. PEARSON,

Chairman Building Committee, Board of Education, City of Duluth.

showing construction
The guides are made of
brass, and will not rust.

THE SCREEN COMPLETE

METAL VS. WOOD.

No swelling, no shrinking as in wood screens; handsome beyond comparison; extremely neat; almost invisible; perfect for convenience last but not least, everlasting in durability; unqualifiedly endorsed by every architect who has seen it.

The accompanying cuts represent the Higgin Metal Frame Fly Screen, which won for itself the highest awards of merit given at The Cotton States and International Exposition, and the Boston Mechanics' Fair, during the season of 1895. This but confirms the long list of personal testimonials that we have received from patrons throughout the country who have used the screen, and pronounce it the neatest, most convenient and durable ever put upon the market.

Notwithstanding that this screen has many unquestionable qualities of superiority over all others, we offer it to the public at the lowest possible price consistent with substantial work.

The New Idea

and there IS a New Idea in everything, has made
itself felt

in Plumbing!

The old methods WERE good methods. They
are now bad methods because there are newer,
better and less expensive methods now.

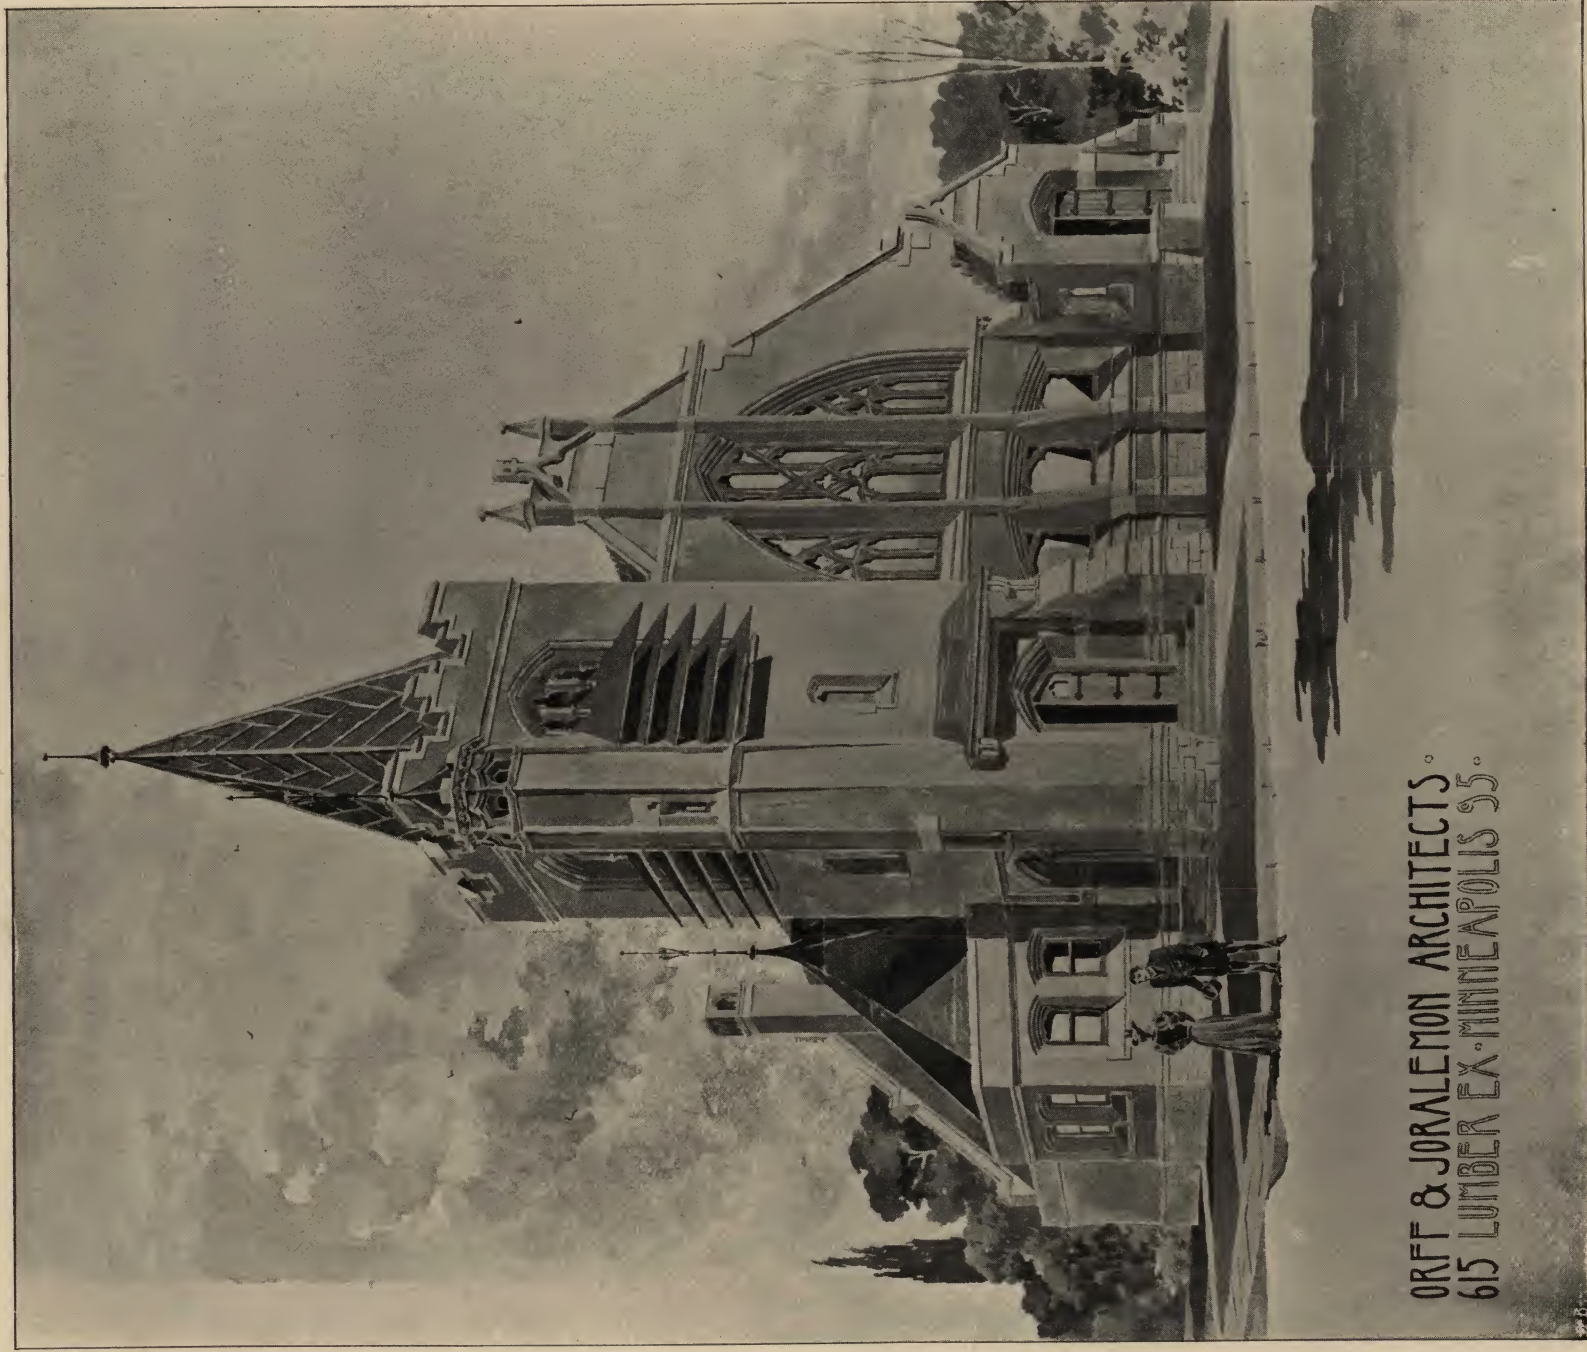

We have taken advantage of all the modern appli-
ances and practical ideas, and furnish work and
materials, not only reasonable in price, but abso-
lutely dependable and healthful.

An opportunity to figure with contractors and
builders is respectfully requested.

VARNISH MAKERS

HOUSE & HOME SPECIALTIES

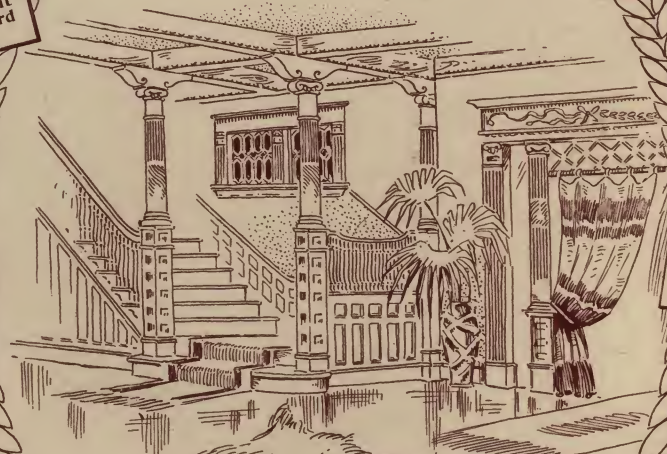

SPAR VARNISH

This Varnish was originally made by us for Spars. It lasts and woodwork on ships and yachts, hence its name "Spar," and having proved such an excellent article for that purpose we commend it to the painters and the public in general who have long felt the need of a first-class Varnish for all exposed work, like front doors, bath rooms, shingles, blinds, store fronts, hard and soft woods, it has not an equal.

38 PRESERVATIVE VARNISHES

...A FIRST-CLASS interior finish for any and all purposes where Quality is the first consideration. This finish is very much like our Spar Varnish, but is intended more for inside work. As its name implies, it preserves and develops the different kinds of woods in their natural beauty. It is not affected by either hot or cold water, nor by steam generated in bath rooms; will not crack blister or turn white.

Never think of BUILDING - Any kind of a building without first reading those books, "Finishing and Staining of Natural Woods," or "Interior Finish of a Modern House." Mailed upon receipt of 4 cts. in stamps.

INTERIOR
FINISH
OF A MODERN HOUSE

110 CABINET VARNISH

Superior to any
Hard Oil Finish.....

This Varnish flows freely, gives a very high lustre, and will rub nicely for dead finish. Dries hard in about 24 hours, and will not crack, peel off or mar. A very durable interior wood finish for all woodwork in churches, schools, dwellings, furniture, etc., either on hard or soft woods.

61 FLOOR VARNISH

A VERY SUPERIOR VARNISH FOR FLOORS
This is an easy working Varnish made expressly for floors. It is exceedingly durable, drying hard over night; does not crack, turn white or blister, and is not affected by either hot or cold water. Recognizing that time of drying is a great feature in floor varnishes, we have made our No. 61 Floor Varnish with this end in view, combining quick drying with durability and elasticity.

ADAMANT...the Perfection of Wall Plaster

The BEST Material on Earth for Covering Walls and Ceilings

It is one of the lost arts and the result of a life work devoted to scientific research . . It received the Medal of Excellence from the American Institute, of New York. Our best architects endorse and specify it. Owners after investigation will have it. Mechanics like to handle it, and contractors praise it.

What is Adamant?

Adamant is a wall plaster that is rapidly superseding the old style lime mortar. By the aid of chemistry the different materials are so combined as to make an Adamant wall fire-proof, wind-proof, and water-proof, always uniform, nearly as hard as marble and as durable as time. It is the only hard plaster that is elastic, adhesive, non-porous and practically indestructible.

For Prices, Circulars and Information in Detail, Address

Adamant Manufacturing Co.

MINNEAPOLIS, MINN.

ADAMANT MFG. Co., Minneapolis, Minn.

Minneapolis, Minn., January 28, 1893

Gentlemen:—We believe Adamant to be what you claim for it “The Perfection of Wall Plaster,” and use large quantities of it in our work.

Yours very truly, ORFF & JORALEMON.

OUR STONE....

Used in constructing the following buildings
is of three varieties.

BUFF and BLUE

MAGNESIAN LIME STONE

AND

WHITE

OOLITIC LIME STONE.

M. E. Church, Marshalltown, Iowa, built entirely of our Buff stone, is one of the finest in the State.

M. E. Church, Cedar Falls, Iowa, built entirely of our White Oolitic Lime Stone, is an exceedingly fine building.

Baptist Church, Des Moines, Iowa, built of a combination of Oolitic and Buff Lime Stone. Handsomely carved, elaborately finished and stands among the best buildings in the Northwest.

The following are a few other buildings in which our stone has been used:

Robins' Library, Arlington, Mass.
New Public Library Building, Boston, Mass.
Court House, Carrol, Iowa.
Goldstone Hotel, Des Moines, Iowa.
Grace Episcopal Church, Chicago, Ill.
Clinton National Bank Block, Clinton, Iowa.

COURT HOUSE.

The Only Suitable Material for

A Blackboard is Slate.

We are the only firm in the Country making a **Specialty** of setting **Slate Blackboards** on the wall thus giving the School Board no anxiety about having a perfect job. Our Workmen are Experts, and only such men can properly set a Slate Blackboard.

Here are some of the places where our boards are used; we will give you the names of more if you want them, and you can write any member of any of such Boards we have done work for, and unless he says our work and material gave his Board entire satisfaction, we do not want you to deal with us:

Minneapolis, Minn.

Duluth, “

Stillwater, “

Brainerd, “
